

INDIVIDUAL CONTRIBUTION FORM

Student Name: Manibai Erkenur

Team Number: Team 6 (Sirius)

Project Title: Student Performance Prediction

Week 1 Contribution

- defined the group name
- selected the dataset and helped define the project task
- collaborated with team members to agree on the initial concept and workflow structure
- collaborated with teammates to agree on the initial concept and workflow structure
- prepared the report for submission

Week 2 Contribution

In Week 2, I

- interpreted relationships between selected features and final grade (G3)
- checked and confirmed that the dataset had no missing values
- wrote explanatory markdown sections for the report to document the process and results clearly

Week 3 Contribution

- imported all required libraries for data analysis, visualization, and machine learning
- loaded the dataset student-por.csv and inspected its structure
- checked data quality and confirmed that the dataset had no missing values
- performed feature engineering by creating avg_grade and grade_diff
- selected relevant numerical features for prediction
- split the dataset into training and testing sets (80/20) using train_test_split
- applied feature scaling using StandardScaler fitted only on training data

Approved by Team Members

I am satisfied with the work of the team. Everyone actively participated, and no one was left out. We discussed ideas together in Google Meet and worked on tasks collaboratively. We also met in

person and even wrote code together on a single laptop. The team worked honestly and in a coordinated way, and everyone tried their best and helped each other. The work and responsibilities were distributed fairly, and everyone consistently participated in the process. Overall, the team demonstrated good cooperation, communication, and responsibility during the project.
